Response to Arguments

1. Applicant's arguments with respect to claims 3-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19-21 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The method recited is not enabling for manufacturing because the limitations do not teach assembly of the elements being provided.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- a. Claims 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schleffendorf. Schleffendorf discloses all of the limitations claimed in the instant invention including positioning the inside foot of the user along the u-shaped divider to rotate the platform (col. 3, lines 33-49) but Schleffendorf doesn't disclose the divider being along a centerline of the platform. It would have been obvious to one having ordinary skill in the art at the time the invention

was made to modify Schleffendorf such that the divider is positioned along a centerline of the platform for ease of allowing the foot of the user to move the platform in different directions.

- b. Claims 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonewitz in view of Destasio. Bonewitz discloses all of the limitations claimed in the instant invention except for the handle being couple to the neck. Destasio teaches a handle coupled to the neck. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Bonewitz in view of the teaching of Destasio such that a handle is coupled to the neck of the device for a user to grasp while exercising.
